Associate Dean: Anil Kumar

College of Business Web Site (<https://new.tamuc.edu/business/>)

Business as a field of study is very broad and practical - everything has a "business" side to it! Whether your passion is social media, basketball, or starting your own company, every industry needs accountants, marketers, managers, financial analysts, and data analytics professionals. In other words, business majors!

The AACSB-accredited programs offered by the College of Business (COB) are designed to produce career-ready professionals who add value to the global business environment. Graduates may be employed in financial services, manufacturing, sales, advertising and market research, accounting, information technology, and general management as well as in a wide range of educational, municipal, state and federal government agencies. Others capitalize on their business education and skills and pursue entrepreneurship.

The COB curricula are designed to teach essential business tools and techniques and, more importantly, they focus on helping develop life-long skills such as flexibility, resilience, opportunity recognition, global awareness and the importance of creating both social and economic value for the betterment of our community and the world.. Specifically, the various programs have been developed to provide:

1. essential business tools and techniques;
2. an understanding of the global, social, ethical, regulatory, global, political, and cultural environments;
3. an understanding of the major functional areas of business and industry;
4. an opportunity for specialized study; and
5. preparation for advanced graduate study.

Students receiving a Bachelor in Business Administration (BBA) or the Bachelor of Science (BS) degree in Business Administration degree will demonstrate competencies in financial and managerial accounting, the business environment and strategy, finance, behavior and organizational issues, marketing, business analytics, quantitative analysis, and production/operations management and economics.

Business majors learn how to research information using quantitative skills, develop creative solutions to real-world business problems, and successfully implement solutions by collaborating as members of diverse teams. Because organizational and individual success requires well-developed soft skills in addition to traditional business acumen of our business curriculum, too

Mission

Inspire transformational learning. Create applied knowledge. Forge impactful connections.

Vision

Transform Minds – Transform Business – Transform Lives

Values

In support of our mission, we value:

- conducting ourselves with the highest level of integrity and mutual respect
- embracing diversity in all its aspects

Requirements for a Minor in a Business Discipline

Students may elect to complete a minor in a business discipline in the College of Business. The business discipline minors offered by the CBE include either

1. a broad-field minor in general business, including courses from several departments within the college; or
2. minors in specialized areas such as accounting, entrepreneurship, finance, general business, corporate management, marketing, business analytics, international business or international studies, economics, or personal financial planning.

Most business minors require the completion of ACCT 2301 Principles of Acct I, ECO 2301 Prin Macro Economics or ECO 2302 Principles of Micro Economics, and a minimum of four advanced courses as approved by the appropriate department head in the College of Business. Marketing or Management minors must complete six courses approved by the department head.

From career assessment and planning, career counseling, interview skill preparation, resume creation and review, and internship and job placement assistance.

COB 1301 - Introduction to Business

Hours: 3

This course provides an understanding of business strategies and how they impact the global economy and wellness of populations. It encompasses various aspects of business, management, and leadership functions, including organizational considerations and decision-making processes relating to people at work. It provides students a survey of economic systems, forms of business ownership, and considerations for running a business. Included are discussions of business challenges, ethics, social responsibility, diversity, and environmental considerations. Emphasized is the dynamic role of business in everyday life.

COB 101 - Dist in Prof Dev Org

Hours: 0

COB 102 - Foundations of Personal Money Management

Hours: 3

The 3 credit hour course is designed to give students the opportunity to learn about the basics of personal financial management. Students will be introduced to topics pertaining to budgeting, financial statements, credit and debt management, investing, compound interest, and retirement planning. This course provides a student with the knowledge to make better financial decisions, set and achieve financial goals, and to become a better-informed buyer in the consumer-driven economy.

COB 108 - The Aurora Initiative

Hours: 3

The Aurora Initiative is designed to help guide students execute projects that generate social and/or economic value. Using the Lean Launchpad methodology, students refine their project ideas by actively researching, interviewing sources, networking, and finding resources. This experience concludes with students pitching their value-creating projects to potential donors with the intention of obtaining financing to advance their projects to a pre-launch stage. This process helps students develop empirical and quantitative skills, critical thinking skills, and communications skills. The syllabus/schedule is subject to change. No prerequisites are required for this course

COB 497 - Special Topics

Hours: 1-3

Organized class. May be repeated when topics vary.
