

Kinesiology and Sports Studies B.S.

Kinesiology and Sports Studies B.S. Web Site (<https://www.tamuc.edu/bs-general-kinesiology/>)

The B.S. in Kinesiology and Sports Studies has five concentrations:

Concentration 1: Physical Education Teacher Education - prepares teachers for early childhood through grade twelve in physical education.

A graduate should possess the following competencies:

1. Knowledge basic and relative to human body function and movement;
2. Knowledge in program planning, essential knowledge and skills, teaching methods, and evaluation;
3. Knowledge of concepts of fitness;
4. Skill in a variety of physical activities; and
5. An acceptable level of physical fitness.

Concentration 2: Allied Health – prepares students for advanced post-graduate programs in allied health, such as physical therapy, occupational therapy, physician assistant, and chiropractic.

Concentration 3: Exercise Science - prepares students to assess fitness, interpret findings, and prescribe individual and group exercise and fitness programs for individuals who are apparently healthy and those with controlled disease.

Concentration 4: Strength and Conditioning – prepares students to optimize performance in athletic and tactical populations.

Concentration 5: General Kinesiology – prepare students for careers in fitness and wellness by customized coursework.

A graduate should possess the following competencies:

1. Knowledge of anatomy and physiology of the human body.
2. Knowledge of concepts of fitness
3. Skill in promoting health, wellness, and nutrition
4. Skill in designing safe and effective fitness programs or physical education
5. Skill in biomechanical analysis, evaluating and improving movement patterns

Concentration 1: Physical Education Teacher Education

Students seeking PE certification will be evaluated on a regular basis by departmental faculty and must be approved to continue in the program. Students must also meet the requirement of the Field-Based Teacher Certification Program.

Secondary and All-Level Education

See for information: **

All-Level Teacher Certification in Physical Education

Students MUST have and maintain a 2.5 overall and major GPA in order to take 300- and 400- level classes in the program.

Concentration 2: Exercise Science

The mission of the Exercise Science concentration is to prepare competent entry-level Exercise Science professionals in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. Using foundational anatomical and physiological knowledge and guidelines published by the American College of Sports Medicine, students will learn to assess fitness, interpret findings, and prescribe individual and group exercise and fitness programs for individuals who are apparently healthy and those with controlled disease. Graduates will also be skilled in evaluating health behaviors and motivating individuals to modify negative health habits and maintain positive lifestyle behaviors for health promotion. Learning and skill development will occur through a variety of methods including lecture, labs, hands-on experience, as well as an internship. Exercise Science graduates possess knowledge and skills desirable in multiple industries. Graduates enjoy a wide range of career options in the university, corporate, commercial, or community settings. The degree can also serve as a foundation for advanced study in exercise physiology, biomechanics, nutrition, physical therapy, occupational therapy, and other graduate health programs.

Students must have a grade of "C" or better in all major and support courses. Students MUST have and maintain a 2.5 overall and major GPA in order to take 300- and 400- level classes in the program.

A grade of "C" or higher must be earned in all courses in this Major. (This includes Support and Elective courses).

Concentration 3: Strength & Conditioning

The Strength and Conditioning concentration within the Health and Human Performance Department at Texas A&M University – Commerce will allow students to achieve proficiency in the skill of performance coaching by having a world class understanding of the science leading of optimizing human potential, and provides real world experience in the strength and conditioning profession. The program focuses on gaining combined competencies of sport/exercise science, management, and individualized and group coaching. The Strength and Conditioning program is designed to prepare students for advanced certification in sports science, to critically evaluate new technologies and program proposals, and be an advocate for their clients in a constantly changing field of sports performance. Graduates will take with them substantial experience, expertise, and other resources to effectively address the challenges of serving as strength and conditioning specialists.

Students must have a grade of "C" or better in all major and support courses. Students MUST have and maintain a 2.5 overall and major GPA in order to take 300- and 400- level classes in the program.

A grade of "C" or higher must be earned in all courses in this Major. (This includes Support and Elective courses).

Concentration 4: General Kinesiology

Students in the general kinesiology concentration will gain knowledge in human movement and physical activity. The degree will prepare students for a career in fitness, wellness, or sport.

Students must have a grade of "C" or better in all major and support courses. Students MUST have and maintain a 2.5 overall and major GPA in order to take 300- and 400- level classes in the program.

A grade of "C" or higher must be earned in all courses in this Major. (This includes Support and Elective courses).

Concentration 5: Allied Health

The Allied Health concentration provides students a background in kinesiology that prepares them for an allied health graduate program. Students can take prerequisite courses for allied health programs such as physical therapy, occupational therapy, athletic training, or other allied health professions. Students select support courses based on the prerequisites for specific professional school programs.

Students must have a grade of "C" or better in all major and support courses. Students MUST have and maintain a 2.5 overall and major GPA in order to take 300- and 400- level classes in the program.

B.S.-M.S. 5 year Accelerated Pathway

BS in Kinesiology & Sports Studies and MS in Health, Kinesiology, & Sports Studies

The BS-MS accelerated degree program allows undergraduate students in the Kinesiology & Sports Studies-Human performance concentration to begin coursework towards the Master of Science in Health, Kinesiology, and Sports Studies-Human Performance program during their senior year at Texas A&M University-Commerce. Students can earn a B.S. and M.S. degree in five years upon completion of degree requirements for both degrees. For this accelerated program, graduate courses cannot be applied to the undergraduate degree. Students must apply to the accelerated program by the end of their junior year after having completed at least 90 hours of undergraduate courses and a cumulative undergraduate GPA of 3.0 or higher. Additionally, students should have taken certain upper-level courses in their junior year to ensure they can be successful taking graduate courses with UG courses in their senior year (e.g., HHPK 335, HHPK 350, HHPK 450). Students must earn a B or higher in these courses. Students will be awarded both degrees at the same time after completing both B.S. and M.S. requirements.
