

# Political Science B.A./B.S. - Legal Studies Emphasis

Curated for those students who plan to attend law school, the BA/BS in Political Science, emphasis in legal studies is a rigorous program of study that gives students the opportunity to learn and develop skills that will help them to succeed in law school in particular, and in any other career they may choose to pursue.

The undergraduate program requires students to select courses from four subcategories: Political Theory and Philosophy, Public Policy, American Government and Politics, and Comparative Politics and International Relations. Each subcategory contains a range of 6-7 courses, from which students must choose two courses (6 semester hours) per subcategory, for a total of eight courses (24 semester credit hours) across all subcategories. In addition, students are required to select 6 semester hours of elective credit (Electives in the Major) from a list of approved courses, along with the Required Courses in the Major.

The Bachelor of Science in Political Science degree also offers an emphasis in Legal Studies, which consists of six specific courses. Please note that some of the Political Science (PSCI) courses that make up the Legal Studies emphasis are also available as electives or as part of the subcategory course listings. Students who choose to complete the Legal Studies emphasis must take the 6 emphasis courses in addition to the required subcategory and elective coursework. Courses cannot be counted toward both the Legal Studies emphasis and the subcategory requirements. In other words, students cannot "double dip" by using Legal Studies emphasis courses to fulfill both subcategory and emphasis requirements.

For students pursuing the Legal Studies emphasis as part of the BS in Political Science degree, it is important to plan accordingly to ensure that these courses are taken beyond the required subcategory and elective coursework.
