

# Political Science B.A./B.S.

A bachelor's degree in political science prepares graduates for a very broad range of educational and career opportunities. Political science graduates have gone on to successful careers in business, public administration, government, teaching, and politics. Others have continued their educations in graduate school and law school. In addition to being knowledgeable in the subject areas of political philosophy, American politics, comparative politics, international relations and foreign policy, and social science research methods; majors in political science develop the ability to think clearly and critically, as well as the ability to engage in effective written and oral communication.
